## PROFILE

- ◆ Enthusiastic and passionate about programming
- ◆ More active when working on a team
- ◆ Like to write high-performance, clean, and reusable code
- ◆ Able to optimize web performance
- ◆ Love to learn and solve problems

## EXPERIENCE

### Software Engineer Intern— *Tiger Tech Ltd.*

OCT 2022 - DEC 2022

Joined as a Software Engineer Intern at Tiger Tech Ltd. Build Some excellent Products for our clients. The hard skills I used while working in this company were HTML, CSS & SCSS, Bootstrap & Tailwind CSS, JS & jQuery, React.js and so on.

## PROJECTS

### TextAnalyzer — React.js, Bootstrap5

TextAnalyzer is a web application, Which will basically analyze your text like how many words are there, how many sentences, how much time will take to learn this paragraph, conversion of lower and uppercase, remove extra spaces and copy text. The source code is available on my Github.

### NewsMonkey — React.js, Bootstrap5

NewsMonkey is a web application, which is basically an online newspaper. In this application I've fetched data from newsapi.org and displayed it on this application with a good style. Categorized news in different segments so that users can easily read their desired category news easily and Save their time. The source code is available on my Github
